

Cellulite

Anticellulite Therapy

Anticellulite treatment which combats localized fat and smooths the skin of the body.

Professional cosmetic body treatment against cellulite and localized fat, while improving the "orange peel" appearance and texture of the epidermis. This treatment is based on the combination of the strong lipolytic action of the enzyme Hyaluronidase, caffeine and cocktail of ingredients in synergy with causing hyperemia in the skin of the body. The ingredient Iodotrat (iodine free) stimulates the cellular metabolism and decongests the body from the fluids retention that form the cellulite.

Main action

Anti-cellulite, lipolysis, smooth skin.

Secondary action

Toning, improved skin uniformity.

Body concerns

Cellulite, localized fat.

Contraindications

In circulatory problems, phlebitis, spider veins and varicose veins, the application of Thermoslim Gel and the use of a thermal blanket are contraindicated.

Key ingredients

Hyaluronidase, Caffeine, Iodotrat, Sveltam, Escin, Centella Extract, Cola Extract, Ruscus Extract, Dead Sea Mud, Fucus Extract, Remoduline, Isoslim Complex, Methyl Nicotinate, Capsico-Tabasco Pepper.

Suggested applications: Minimum 10 sessions.

Session duration: 45 minutes

Repeatability: 2 times a week

Maintenance: 2-3 times a month

Step 1: Detoxifying Peeling

At this stage we combine the action of removing dead skin cells with a strong keratolytic and detoxifying action.

Detoxifying Peeling Gel (12ml)

Apply 12ml Detoxifying Peeling Gel on the area to be treated and massage gently until it is absorbed. Do not rinse.

(Duration: 5 minutes)

Step 2: Anticellulite System

This stage aims to improve the appearance of "orange peel" and the uniformity of the skin of the body, as well as to strengthen the walls of the skin's capillaries.

Anticellulite System (1/2 vial)

Remove the white protective cap. Press the piston down to mix the powder contained in the lid with the solution of the vial and shake well until it is completely dissolved. Apply half of the amount contained in the Anticellulite System vial on dry, clean skin and massage gently until it is absorbed.

(Duration: 5 minutes)

Step 3: Thermoslim

This stage aims to increase the metabolic action of lipolysis by the intense hyperaemia caused in the skin (Capsico-Tabasco Pepper and Methyl Nicotinate) in synergy with the action of lipolytic active ingredients.

Thermoslim Gel (12ml)

Apply 12ml Thermoslim Gel on dry, clean skin and massage until adsorbed.

(Duration: 7 minutes)

Step 4: Celluslim Mud

At this stage, the process of lipolysis is enhanced, and the skin's uniformity and elasticity are improved.

Celluslim Mud Mask (50ml)

Apply 50ml Celluslim Mud Mask on the skin and wrap the body with cellophane. Optionally we can use a thermal blanket at a low temperature.

Leave on for 20 minutes and rinse with water.

(Duration: 20 minutes)

Step 5: Anticellulite System

At this stage, the Anticellulite System is reapplied to enhance its action.

Anticellulite System (1/2 vial)

Apply the remaining amount contained in the Anticellulite System vial on dry, clean skin and massage until it is absorbed.

(Duration: 5 minutes)

Step 6: Lipofykia

At this stage, the cellular metabolism is activated, the microcirculation is enhanced, and the uniformity of the skin is improved.

Lipofykia Gel (8ml)

Apply 8ml Lipofykia Gel and massage gently until it is absorbed.

(Duration: 3 minutes)

Step 7: Home Daily Regimen

- **Thermoslim Gel**
- **Lipofykia Gel**

Strongly recommend tactical use of home regimen products after and in between treatments, until all the quantity contained is used.

Cellulite Anticellulite Therapy

	Step	Product	Quantity/ application	Duration
1	Detoxifying Peeling	Detoxifying Peeling Gel	12ml	5 minutes
2	Anticellulite System	Anticellulite System	1/2 vial	5 minutes
3	Thermoslim	Thermoslim Gel	12ml	7 minutes
4	Celluslim Mud	Celluslim Mud Mask	50ml	20 minutes
5	Anticellulite System	Anticellulite System	1/2 vial	5 minutes
6	Lipofykia	Lipofykia Gel	8ml	3 minutes
